AVANTGARDE

From Function to Experience

Hartan and Mercedes-AMG GmbH are launching their first joint collection. In collaboration with the Mercedes-Benz Designers, Mercedes-AMG and Hartan have teamed up to create a unique stroller model that combines sportiness, flexibility and maximum driving comfort in a very special way.

With a compact folding dimension of 69 x 58,5 x 31cm, the AMG GT stroller (with the seat unit) is class leading.

Engineers did a great job, by creating an extremely small folding size, even with large swivel wheels, which are suitable for any terrain. A visual highlight are the cross-spoke wheels in the original AMG design.

Carrycot and seat unit are handcrafted with Artico and Dinamica, both materials originating from Mercedes-AMG car interior, withstanding the highest requirements in automotive industry. The seat unit is reversible and has a multi-adjustable backrest including a lay flat position. Other useful features include the height adjustable footrest, the fold-down canopy for additional sun protection plus a ventilation panel. Other features include a removable and adjustable bumper bar and a height adjustable handle with color-matching and high quality stitching. Selected infant carrier car seats can also be attached thanks to the matching adaptor (accessory).

Inklusive Bag2go

AMG chassis with car seat
(Car seat adaptor available as an accessory)
